FORTH INSPECTION SERVICE IS AN ORGANISATION WHOSE EXPERTISE IN BOTH CONVENTIONAL AND SPECIALIST NDT INSPECTION TECHNIQUES DATES BACK MORE THAN 25 YEARS.

PROVIDER OF NDT CONSULTANCY TO ALL INDUSTRIAL ENERGY SECTORS

The business provides NDT consultancy to customers in various sectors including renewable energy, defence and power generation and also in the oil and gas industry, both upstream and downstream.

Forth Inspection Service is committed to providing client focused, proactive inspection solutions. The company takes great pride in offering a personal, professional service and works closely with clients to find the best solution to their requirements.

An international company based in the UK and with most of its work based in Scotland, Forth has also worked in Denmark, Norway, France, Italy, Japan and Holland.

Forth is also working closely with various companies to develop specialist NDT techniques to inspect both new and in-service components.

Forth Inspection Service has developed NDT strategy and associated procedures for various energy sectors as well as offering advanced inspection techniques to larger inspection companies within Aberdeen.

Forth also offers training, working closely with a number of companies within Aberdeen to deliver general training and seminars on non-destructive testing. It can also offer support in highly specialist areas such as application-specific training.

In addition, Forth can offer an extensive range of consultancy – from basic one-off consultancy right through to long term project support.

SERVICES

Forth Inspection Service provides consulting, preparing procedures, written practice, third party Level 3 Services, specialised witness and other QA/QC services.

Level 3 Services are available in the following areas:

- > Conventional NDT validation, procedure development and approval
- > Specialist NDT inclusive of Phased Array, TOFD and Computed Radiography validation, procedure development and approval
- > Bespoke application specific training
- > In-house engineering support training packages
- > Technical and Quality Auditing services
